Pippin: Algorithm flowcharts

Brief Task 1, Activity B. Five of the more complex things the T Level Connect website does, drawn as simple flowcharts. Each one starts at the top and follows the arrows down. At each diamond, follow the arrow for the answer, Yes or No.

The detailed versions, with every rule and limit, are in the pseudocode document (algorithm-designs.md).

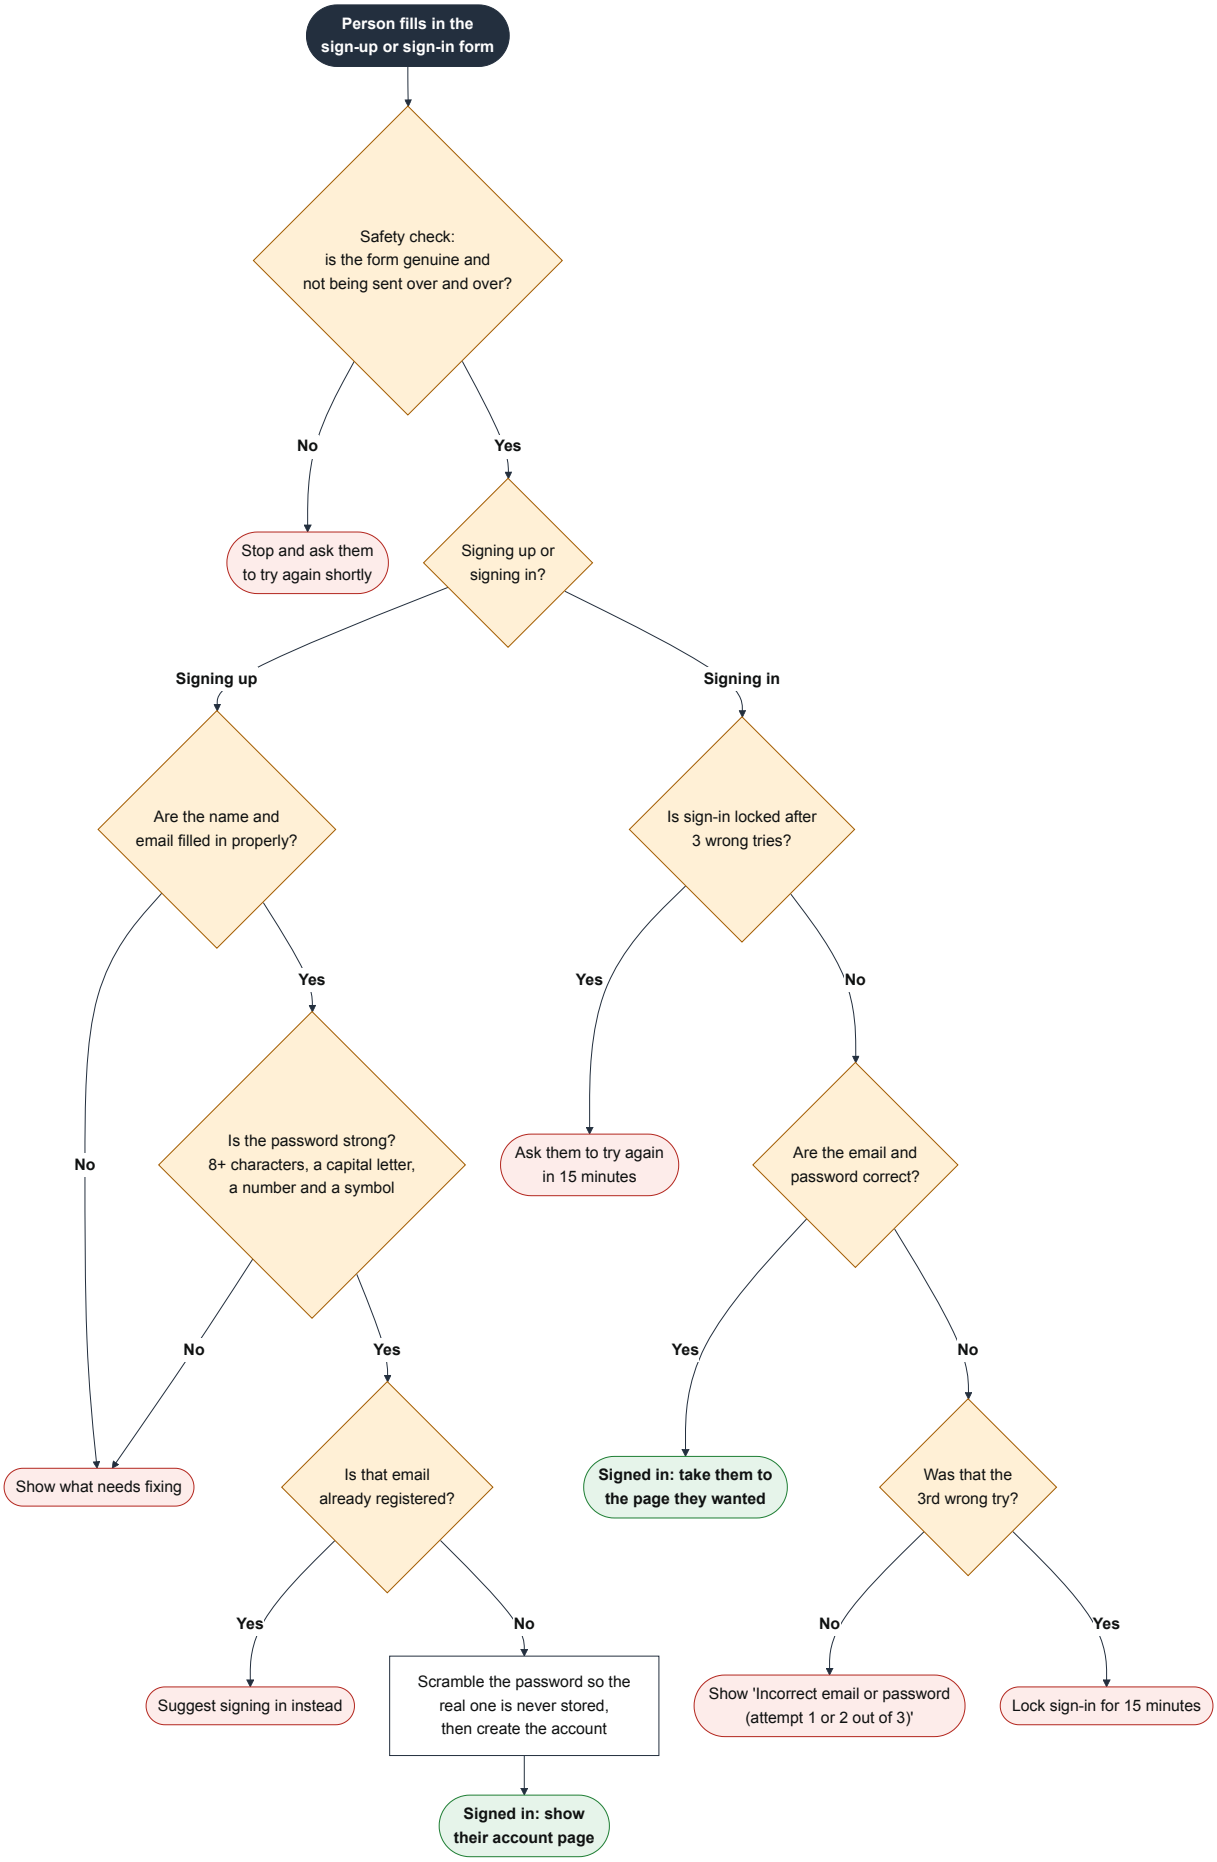

How to read the charts

Dark rounded box	Where it starts: what the visitor does
White box	Something the website does
Orange diamond	A question the website checks. Follow Yes or No
Green rounded box	A good ending: it worked
Red rounded box	It stops here and tells the visitor why
Grey dashed box	A note explaining something, not a step

What happens when someone creates an account or signs in, including the check that locks sign-in for 15 minutes after 3 wrong passwords.

1. Signing up and signing in

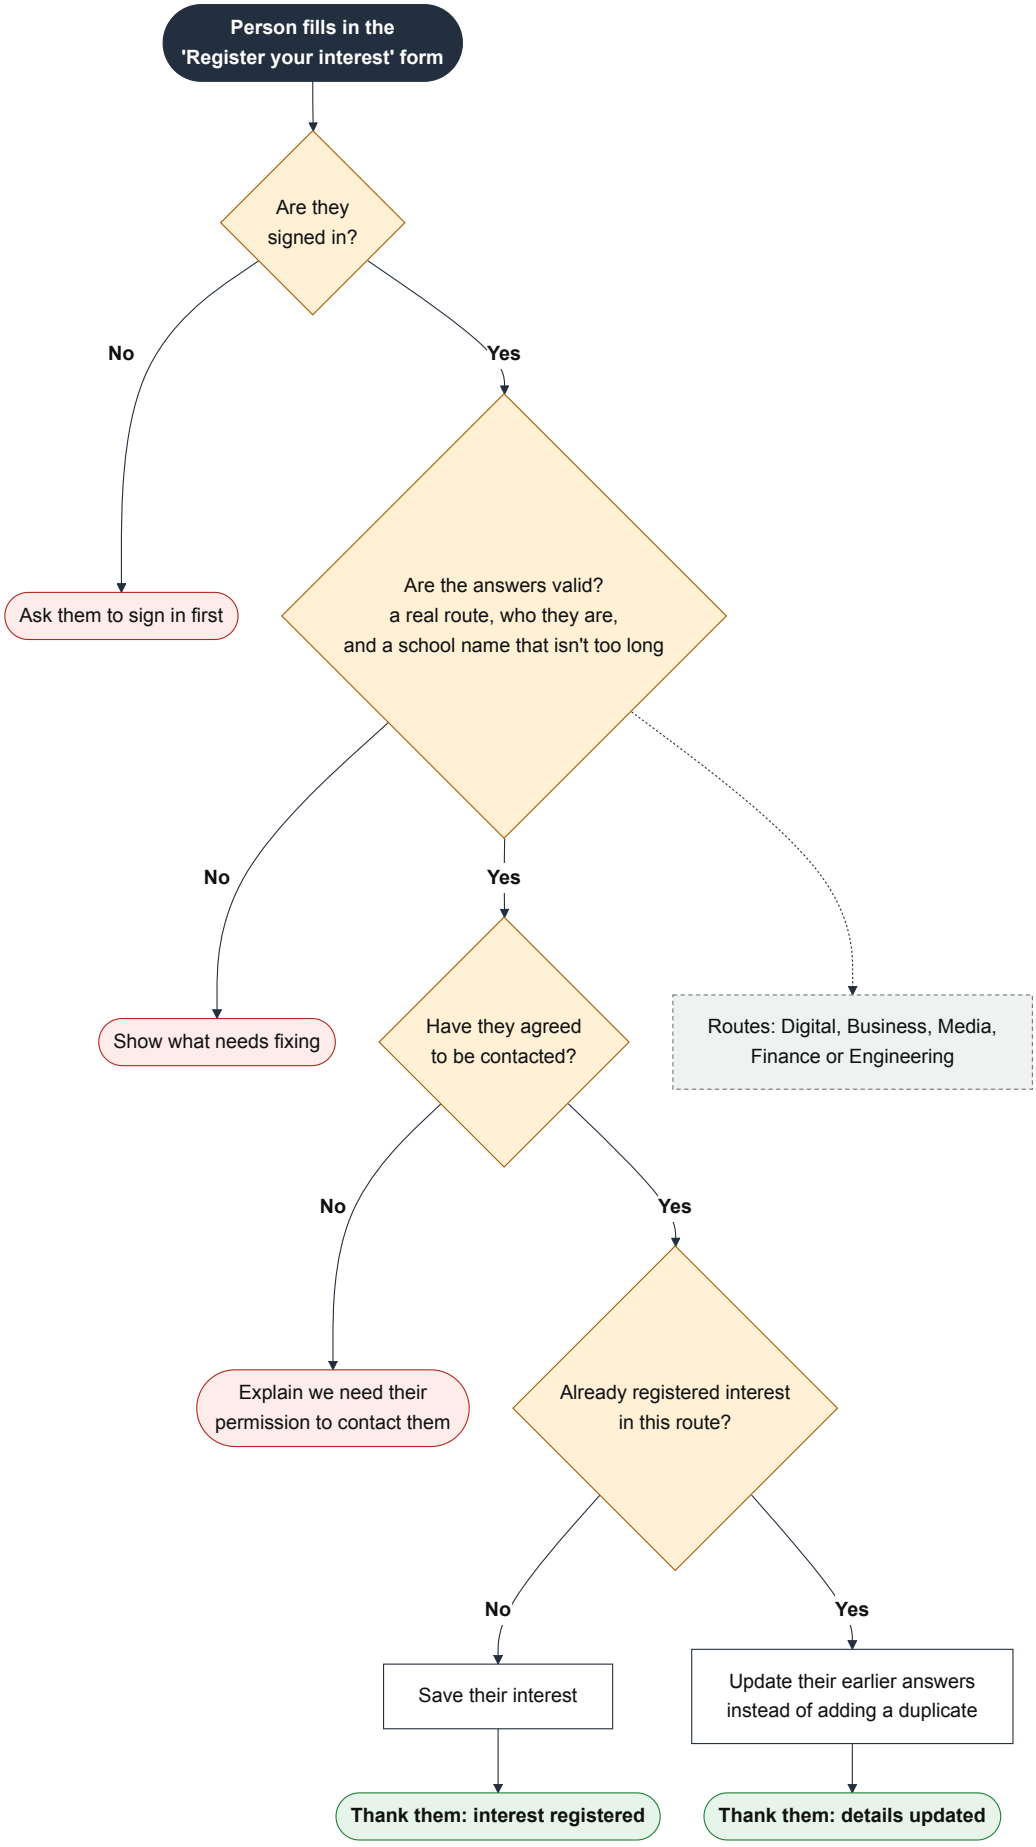

What happens when a visitor asks the chat assistant a question, from the first safety checks to the reply appearing on screen.

2. Asking the chat assistant a question

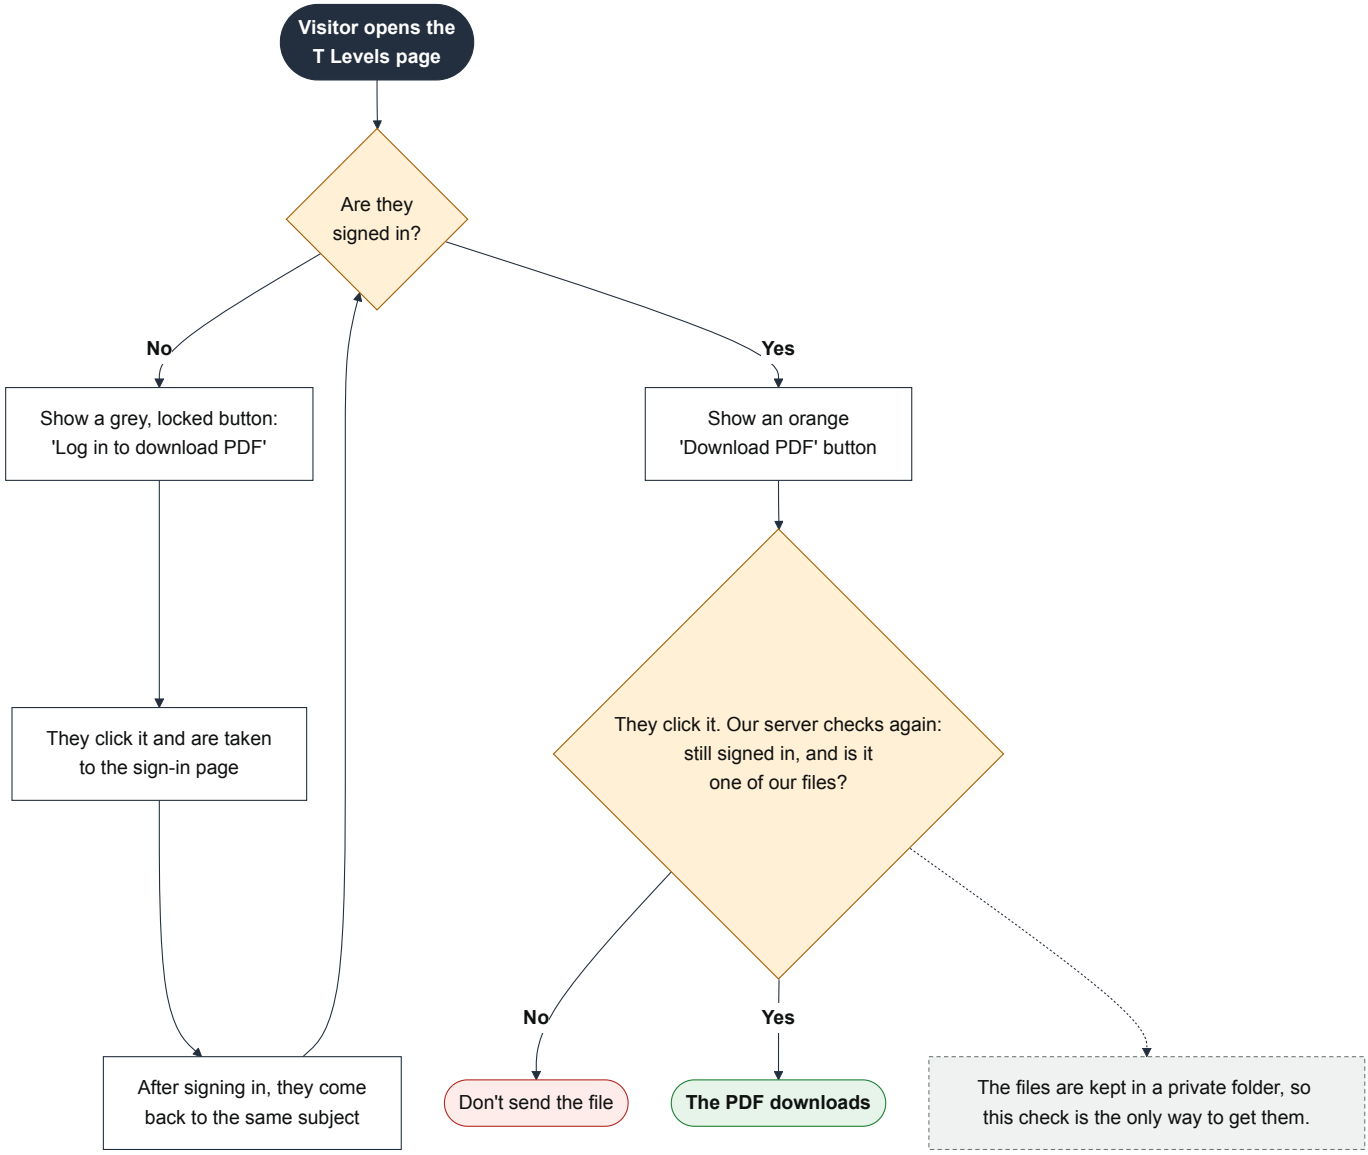

How a signed-in user will register interest in a placement route. This feature hasn't been built yet, so this shows the plan.

3. Registering interest in a placement (planned)

How the course guide PDFs on the T Levels page are kept for signed-in members only.

4. Downloading a course guide (members only)

How the search box in the top bar finds the most relevant page for whatever the visitor types.

5. Searching the site
